

Subject Index

- 2-Acetyl, 4-tetrahydroxybutyl imidazole (THI), lymphopenic effects of, and vitamin B₆, 311-312
- Adipose tissue, effects of cachectin/TNF on, 344
- Ammonia caramel, and lymphopenic effects of THI, 311-312
- Anorexia, and interleukin-1 and dietary fatty acids, 332-338
- Antibodies, formed in neonatal rat, effect of dietary selenium on, 289-291
- Antiinflammatory effects of human milk, 240-241
- Antimicrobial agents in human milk, 236-239
- Antioxidant micronutrients and immune responses, 168-180 in Down's syndrome, 313-315
- Antitumor immune response, effect of carotenoids on, 92-109
- Ascorbate-mediated immunostimulation, 34-48
- Ascorbic acid (*see also* Vitamin C) and cancer, 80-81 and mononuclear leukocytes, 275-277 antioxidant effects of, 175 transport of, in human neutrophils, 319-322
- ATP generation in leukocytes, and ascorbate-mediated immunostimulation, 34-48
- Autoimmune disease, nutrient modulation of, 208-217
- B** lymphocytes, zinc transport in, and mitogenic stimulation, 278-280
- Beta carotene (*see also* Carotenoids), safety of, 259
- Blood mononuclear cells of copper-deficient rats, phenotypic and functional alterations in, 283-285
- Breast milk and immunity, 232-235
- C**-reactive protein opsonizing dead cells and stimulating cytokine production, 351-361
- Cachectin/TNF and other cytokines, metabolic effects of, 339-350
- metabolic responses to, 325-331
- Calcium and cancer, 82
- Cancer, micronutrient-lipid interaction in, 78-91
- Caramel, ammonia, and lymphopenic effects of THI, 311-312
- Carcinoma, oral, and carotenoids, 93-96
- Carotenoids, effect of, on antitumor immune response, 92-109
- Cells blood mononuclear, of copper-deficient rats, phenotypic and functional alterations in, 283-285 dead, opsonized by C-reactive protein, 351-361
- Cellular immune functions, and vitamin C, 34-48
- Childhood mortality, and vitamin A status, 17-23
- Cholesterol-lowering activity, plasma, of monocyte colony-stimulating factor, 362-370
- Copper deficiency of, and immune response, 12-13, 147-159 blood mononuclear cells in, phenotypic and functional alterations in, 283-285 safety of, 262
- Cytokines and acute phase proteins and tissue injury, 351-361 and osteoporosis, 371-375 metabolic responses to, 325-331 production of, stimulation of, by C-reactive protein, 351-361 related to cachectin/TNF, metabolic effects of, 339-350
- D**ebriement, C-reactive protein opsonizing in, 351-361
- Deficiency copper, in rats, and blood mononuclear cells, 283-285 vitamin B₆, immunologic and hematologic effects of, 292-293
- Dietary modulation of autoimmune disease, 208-217
- Disease autoimmune, nutrient modulation of, 208-217 resistance to influence of iron on, 140-146

role of vitamin E in, 24-33
 Down's syndrome, and antioxidant vitamin levels, lipid peroxidation, and immune status, 313-315

Elderly population
 immune function in
 and micronutrients, 196-207
 and vitamin B₆, 49-54, 303-306
 nutritional factors in, immune parameters of, 309-310

Enzymes, antioxidant, 170-172
 Epidermolysis bullosa, and serum zinc, 114-115

Fatty acids, dietary, and anorexia and interleukin-1, 332-338

Fibronectin in human milk

Free radicals and the immune system, 168-170

Glyceraldehyde-3-phosphate dehydrogenase, hypochlorous acid-mediated inactivation of, 34-48

Hematologic effects of moderate vitamin B₆ deficiency, 292-293

Host defense mechanisms, and micronutrient deficiency, 9-11

Human immunodeficiency virus
 inducing immunosuppression, role of zinc in, 286-288
 infection with
 alteration of serum zinc level in, 117-118
 and micronutrient status, 189-195

Hypochlorous acid-mediated inactivation of glyceraldehyde-3-phosphate dehydrogenase in leukocytes, 34-48

Iodine deficiency and immune response, 13
 Immune effectors, hamster and mouse, and effect of carotenoids, 92-109

Immune functions
 and micronutrients, overview of 9-16
 cellular, and vitamin C, 34-48
 clinical significance of micronutrients in, future role of micronutrients on, 267-274
 in elderly persons, and micronutrients, 196-207
 in smokers, and micronutrient status, 218-231
 in tuberculosis, micronutrient status in, 59-69
 Immune parameters of nutritional factors in elderly populations, 309-310

Immune responses
 and antioxidant micronutrients, 168-180
 antitumor, effect of carotenoids on, 92-109
 in copper deficiency, 147-159
 of healthy elderly persons, and vitamin B₆, 303-306

physiological and pharmacological effects of zinc on, 113-122
 role of vitamin E in, 24-33

Immune status in Down's syndrome, 313-315

Immune system
 and vitamins, overview of, 5-8
 role of selenium in, 123-139

Immunity
 and infant nutrition, 232-235
 and minerals, 110-112
 influence of iron on, 140-146

Immunocompetence in the elderly, effect of vitamin B₆ on, 49-54

Immunologic and nutritional relationships of human milk, 236-245

Immunologic effects of moderate vitamin B₆ deficiency, 292-293

Immunostimulation, ascorbate-mediated, 34-48

Immunosuppression, HIV-induced, role of zinc in, 286-288

Immunotoxic effects of lead in lead-exposed animals, 160-167

Immunotoxicology, 160-161

Infant nutrition and immunity, 232-235

Infections
 neonatal, nutritional influence on, 246-256
 HIV

alteration of serum zinc level in, 117-118
 and micronutrient status, 189-195
 resistance to, and vitamin A status, 17-23
 susceptibility to, and micronutrients, 181-188

Injury, tissue, C-reactive proteins in, 351-361
 Interferon alpha, plasma, measurement of, 372

Interleukin-1, and anorexia and dietary fatty acids, 332-338

Iron
 and susceptibility to infection, 182-184
 deficiency in, and immune response, 13-14
 influence of, on immunity and disease resistance, 140-146
 overload of, in thalassemia major, 115-117
 safety of, 262

Lactoferrin, 236-237

Lead, immunotoxic effects of, in exposed animals, 160-167

Leukocyte counts in zinc metabolism in man, 316-318

- Leukocyte function generating superoxide and vitamin E, 307-308
- Leukocytes
 - hypochlorous acid-mediated inactivation of glyceraldehyde-3-phosphate dehydrogenase in, 34-48
 - in human milk, 239
 - mononuclear, and ascorbic acid, 275-277
- Lipids
 - and cancer, 82-86
 - interacting with micronutrients in cancer, 78-91
- Lipid peroxidation in Down's syndrome, 313-315
- Lymphocyte counts in zinc metabolism in man, 316-318
- Lymphocytes, T and B, zinc transport in, and mitogenic stimulation, 278-280
- Lymphopenic effects of THI, and vitamin B₆, 311-312
- Lysozyme in human milk, 237

- M**acronutrients interacting with micronutrients, 86-87
- Macrophage function, chicken, and combined vitamin E selenium deficiency, 281-282
- Malnutrition and the immune system, 267-274
- Manganese, safety of, 263
- Metabolic effects of cachectin/TNF and related cytokines, 339-350
- Metabolic responses to cachectin/TNF and other cytokines, 325-331
- Metabolism, zinc, and leukocyte and lymphocyte counts, 316-318
- Micronutrient deficiency and neutrophil function in sickle cell disease, 70-77
- Micronutrient safety, 257-266
- Micronutrient status
 - and HIV infection, 189-195
 - and immune function
 - in smokers, 218-231
 - in tuberculosis, 59-69
- Micronutrients
 - and immune function
 - in the elderly, 196-207
 - overview of 9-16
 - and susceptibility to infection, 181-188
 - antioxidant, and immune responses, 168-180
 - clinical significance of, in relation to immune function, 55-58
 - excessive intake of, 14-15
 - future role of, on immune functions, 267-274
 - interacting with lipids in cancer, 78-91

- Milk, human, immunologic-nutritional relationships of, 236-245
 - and autoimmune disease, 211-214
 - and immunity, 110-112
 - safety of, 261-263
- Mitogenic stimulation and zinc transport in T and B lymphocytes, 278-280
- Molecular mechanisms and the immune system, 268
- Monocyte colony-stimulating factor, plasma cholesterol-lowering activity of, 362-370
- Mononuclear cells
 - and ascorbic acid, 275-277
 - of copper-deficient rats, phenotypic and functional alterations in, 283-285
- Mortality
 - and morbidity, and vitamin A status, 184-186
 - childhood, and vitamin A status, 17-23

- N**eonatal infections, nutritional influence on, 246-256
- Neutrophil function
 - and neonatal infection, 252-253
 - in sickle cell disease, and micronutrient deficiency, 70-77
 - oxidant effects on, 36-37
- Neutrophils, ascorbic acid transport and accumulation in, 319-322
- Nutrient modulation of autoimmune disease, 208-217
- Nutrition, infant, and immunity, 232-235
- Nutritional and immunologic relationships of human milk, 236-245
- Nutritional factors in the elderly, and immune parameters, 309-310
- Nutritional influence on neonatal infections, 246-256

- O**ligosaccharides-glycoconjugates in human milk, 239
- Opsonization of dead cells for debridement, C-reactive protein in, 351-361
- Oral carcinoma and carotenoids, 93-96
- Osteoporosis and cytokines, 371-375

- P**eroxidation, lipid, in Down's syndrome, 313-315
- Phagocytic function in malnutrition, 247
- Pharmacological effects of zinc on immune response, 113-122
- Physiological effects of zinc on immune response, 113-122

- Plasma cholesterol-lowering activity of monocyte colony-stimulating factor, 322-370
- Protein-energy malnutrition, immunocompetence in, 11
- Proteins, C-reactive, opsonizing dead cells and stimulating cytokine production, 351-361
- Pyridoxine, safety of, 259

Recommended dietary allowances for micronutrients, 272

- Resistance to infection and vitamin A status, 17-23
- role of vitamin E in, 24-33
- Retinoids and cancer, 79

Safety of micronutrients, 257-266

Secretory IgA in human milk, 237-238

Selenium

- deficiency in and immune response, 13
- combined with vitamin E deficiency, and chicken macrophage function, 281-282
- effect of, on formation antibodies in neonatal rat, 289-291
- role of, in immune system, 123-139
- safety of, 262
- Septic shock syndrome, metabolic responses in, 326
- Sickle cell disease, neutrophil function in, and micronutrient deficiency, 70-77
- Smokers, immune function in, and micronutrient status, 218-231
- Superoxide generated by leukocyte function, 307-308

- T** lymphocytes, zinc transport in, and mitogenic stimulation, 278-280
- Thai females, cellular immunity to *Canadida albicans* in, and plasma zinc, 300-302
- Thalassemia major, iron overload and zinc deficiency in, 115-117
- Tissue injury, C-reactive proteins in, 351-361
- Tissue remodelling, cachectin/TNF in, 328-329
- Tuberculosis, immune function in, and micronutrient status, 59-69
- Tumor necrosis factor, metabolic effects of, 339-350

Vitamin A and resistance to infection and childhood mortality, 17-23

- deficiency in, and immune response, 14
- infection-related mortality and morbidity relative to status of, 184-186
- safety of, 258-259
- Vitamin B₆ and aging immune system, 200-201
- and immune response of healthy elderly persons, 303-306
- and immunocompetence in the elderly, 49-54
- and lymphopenic effects of THI, 311-312
- deficiency in, moderate, immunologic and hematologic effects of, 292-293
- Vitamin C (see also Ascorbic acid) and aging immune system, 198
- and cellular immune functions, 34-48
- safety of, 260
- Vitamin D and cancer, 81
- and cytokines and osteoporosis, 371-375
- Vitamin E and aging immune system, 198-200
- and cancer, 79-80
- and immune response and disease resistance, 24-33
- and selenium deficiency, combined, and chicken macrophage function, 281-282
- antioxidant effects of, 173-175
- generated by leukocyte function, 307-308
- safety of, 259
- Vitamins and autoimmune disease, 214-215
- and the immune system, overview of, 5-8
- antioxidant, 172-173
- in Down's syndrome, 313-315
- deficiency of, in tuberculosis, 59-69
- research in, impediments to, 7
- safety of, 258-261

- Z**inc and aging immune system, 201-202
- and cancer, 82
- physiological and pharmacological effects of, on immune response, 113-122
- role of, in HIV-induced immunosuppression, 286-288
- safety of, 261-262
- Zinc balances in zinc metabolism in man, 316-318
- Zinc deficiency and immune response, 11-12
- in tuberculosis, 62-64
- in thalassemia major, 115-117
- Zinc level, serum, in HIV infection, 117-118
- Zinc transport in T and B lymphocytes, and mitogenic stimulation, 278-280
